

## ME7225 : ENDSEM GRAPHS : QSET 2

[ GIRISH MADHAVAN ME20B072 ]

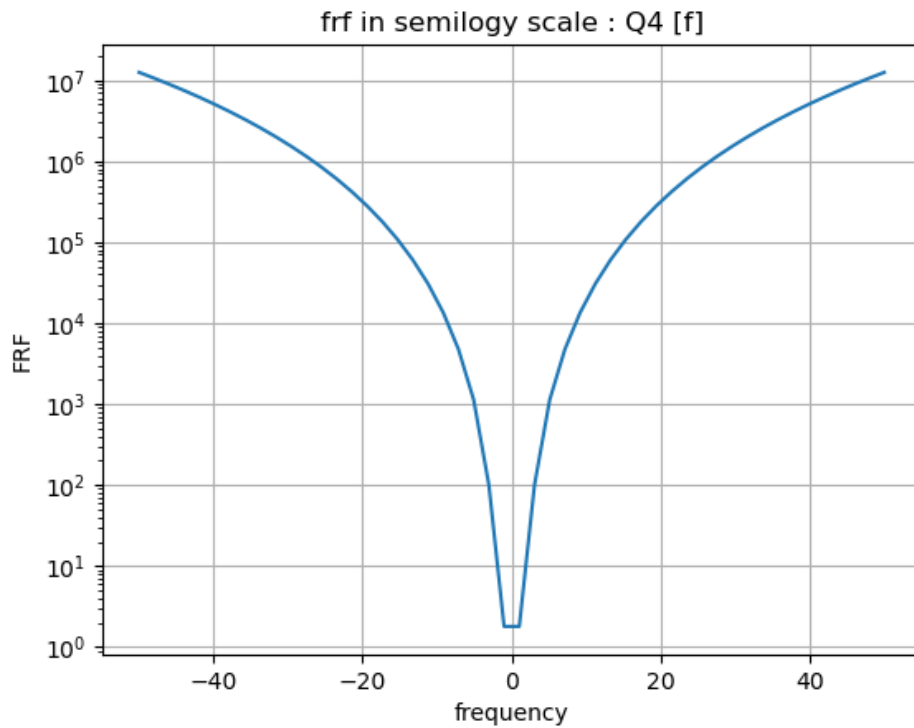

- 1) Plot showing the real part of Fourier Transform varying with the frequencies

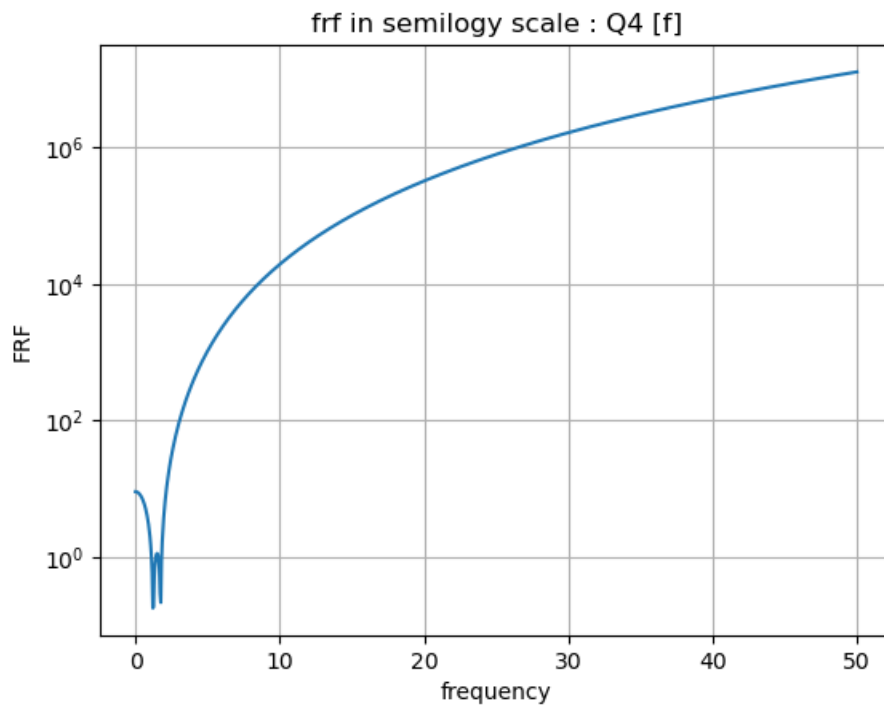

- 2) c) Plot showing the variation of q with p

4) Absolute Frequency response function in semilogy scale [f] :

The above plot contains the frequency responses from frequency values -50 to 50

Here the FRF is plotted for frequency values from 0 to 50, the initial variation at smaller frequencies is much more visible in this graph

Impulse Response Function vs time [g] :
